“Ys-UP!”

Ys-UP! is a bi-weekly introduction to the 4IR World's "Learning > Thinking > Doing > Competitively" Tools — "Visceptuals" — for optimizing your Intellectual Functionality Ys-ly.

"Visceptuals" are designed specifically for the "Ys Ways Capable" and their accomplices — who can complement and collaborate with those who have the Right Stuff in a 4IR "Age of Automation" workplace.

Ys-UP! is an online resource for those who want to increase their **physical health and functional intelligence** strongly enough to do "something" in order to get a raise, a promotion, a better job (or help their children/grandchildren move out of the house).

John M. Comer, Scholastic Engineering LLC

America needs a larger, **smarter** workforce to compete in the 4th Industrial Revolution (4IR) "Age of Automation"

U.S. Productivity has been below 1.4%/year for the last 5 years. Low productivity is not a tech problem. Low productivity is a people/management problem — too much 20th Century Thinking, Management.

"We are going to need people who understand the physical processes of translating materials from one form to another, but they are also going to have to understand the digital mechanics behind it" said Irene Petrick, director of business strategy at Intel.

Almost 30% of the U.S. workforce needs to acquire new "capabilities" in order to resurrect the U.S. economy.

During the Age of Automation, knowledge/data has no value **unless** it is in the context of a Global community competing on the basis of Price:Value products and services, while communicating on Social Media.

There are 7.3 million well-paying jobs with a future that U.S. Employers can't fill. Americans are not smart enough — thanks to their U.S. K-12/16 Schooling.

The **Next 10 Years** in the U.S. workplace

After replacing America's Customer Service Reps during the next 3 years, A.I. will start replacing U.S. Knowledge Brokers/Curators and other redundant Data Sources. The transition to the Age of Automation can be socially disruptive and financially painful, or it can be a walk in the park. It is time for responsible Americans to help themselves, their dependents and their constituents to —

Wake up! Ys-UP! and get their heads out of the Clouds (literally and figuratively); reclaim their American "Knack" and get back in the game; and manage their choices, their lifestyle, and their career.

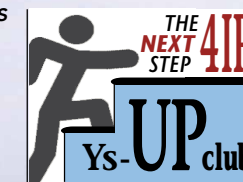

You, yours and your constituents can learn HOW-TO put their situation, circumstance, behavior into comprehensible/manageable **Context** via Ys-UP!

If you can keep your head when all around you are losing theirs — either you don't understand the situation or you are a Ys-Person who FREE-ly subscribes to Ys-UP!

The 21st Century Global Economy is a game designed for Ys Americans and American legal/political/historical perspectives. Americans can get their "Knack" back.

Ys-UP! "Visceptuals" show employees, supervisors, managers and executives of Industry 4.0 enterprises HOW-TO acquire 4IR requisite Adaptability Skill Sets (DIY Prep/OJT)

Those who would like to talk to like-minded people in their area can sign up for Ys-UP! Skype-In "RapAounds" or have personal meetings of the participants — by the participants for the participants. Groups that would like a Mentor to participate can form a Ys-UP Club.

It is possible to get up-to-speed for the Age of Automation via Ys-UP! bi-weekly "Visceptuals" — and referencing YsCouncils.com / PathwaysToTech.com / ChurchOfOurFoundingFathers.com, plus: Google / Siri / Cortana / Wikipedia, et al. However, the Ys-UP Club is faster/easier.
