

# Our Overture

**Our Overture Session is a participatory demonstration of a 21<sup>st</sup> Century Ys-Session — building “Functional Intelligence” = Concepts in Context + Collaboration in Concert.**

*If you want to be happy — do drugs. If you want to be satisfied with yourself, your life, your prospects — Learn how-to “Manage” your Relationships, your Lifestyle, your Career — Ys-ly!*

Can you fit in a Ys-World?

**In 2000, the World became a Global Economy.** And, the U.S. Commercial/Industrial Complex, by subscribing to stockholder value instead of customer satisfaction, failed to upgrade tools, equipment and management practices — so cannot toe-the-mark of Global Price:Value.

Success in a **Global Economy** is dictated by the **Price:Value** of individual company's Products/Services. Price:Value is dictated by Employee Productivity. (Margins based on the adaption of labor-saving tools and techniques.) Employee Productivity is controlled by the participation of employees in production management (aka: employee orchestration of the adaption of labor-saving tools and techniques) = **Collaboration**.

The role of managers/management in Price:Value competition is that of Arbitrator/Bean Counter. The USA's Biz School's franchise management perspectives have not fared well in the Global Marketplace. The USA has lost 25% of its share of Global GDP since 2000 and the USA share is still dropping. Tariffs are not a substitute for Price:Value.

The U.S. just signed a new trade agreement with Canada over dairy Products and the 2 largest U.S. dairy producers promptly filed for bankruptcy. One will disappear and the other will try to reorganize. Thousands of American jobs lost — increased Dairy Product Trade deficit to be replaced by another consumer sales tax (aka: tariffs).

America's Industrial/Ag comeback started in California in about 1985 and is still focused in California. (Apple doesn't need tariff protection; neither do California farmers.) Can other States follow California down the Path to Prosperity? We are about to find out.

The Global Economy's A.I.-driven “Age of Automation” requires a Bi-Model Workforce — the Top Tier of which must **SHIFT** from U.S. Schooling's X-DNA-driven Cognitive/Critical Thinking (based on Data/Dogma/Inference/Replication/Subscription) – to – SciTech's Y-DNA-driven Conceptual/Contextual Thinking (based on Anticipation/Adoption/Functional Intelligence/Mental Acuity that can Initiate/Innovate/Collaborate > DIY On-the-Fly).

### **A Ys-Path to Prosperity — during the A.I. “Age of Automation” Global Economy (2012–2048)**

**Veterans** are actually the best prospects for successful Top Tier, light industrial production employment in SciTech's A.I.-driven “Age of Automation”. They have been Ys-ly identified. Veterans can be complemented by Ys-Consociates: Community College Students, low-GPA University Students, Outliers, Mavericks, Drop-outs, and Non-violent Felons who have faced a hostile U.S. K-12/16/20 world or a hostile urban environment — and *survived*.

**“An Overture to — A Ys-Path to Prosperity during the A.I. Age of Automation Global Economy, 2012–2048”** is presented as a typical Skype Right-in Ys-session with Visceptuals and

appropriate forms — as are the 26 Ys-UP America sessions that can lead directly to Top Tier employment in America's 21<sup>st</sup> Century, 4IR<sup>2</sup> Workforce.

Keep in mind, our Ys-Perspectives are based on Nobel Prize-validated Biological Science and Functional Intelligence. We are SciTech – Apple Corp – Americans. It's the Ys-er Way to be.

**During the Overture**, Veterans and their Ys-Consociates can discover How-to enhance their Functional Intelligence to SciTech levels, while acquiring the requisite unique Knowledge, exceptional Capabilities, competitive Competencies, and ambient Perspectives that separate Silicon Valley, California, and similar environs, from declining-wage America and its opioid epidemics.

Ys-UP America!, with the cooperation of the VA, can actually reduce Veterans' PTSD-generated suicide rate by 90% in 90 days in local, certified, 4IR<sup>2</sup> A.I.-driven “Age of Automation” Workforce Regions. Veterans can not only get their lives back, they can begin enjoying life as members of America's Top Tier, 4IR<sup>2</sup> Workforce.

**Our Overture** is a Skype-Right-In, face-to-face session; 12–36 attendees; Workbook with “Visceptuals”, Collaborative Exercises and Postulate Forms (\$48). Americans get to choose where they best fit. 1) Top Tier –or– 2) Servant Class. You can make your choice — HERE > NOW!

We need 3 weeks of lead time to send Workbooks (via USPS) and schedule sessions. Contact: Overture@YsUpAmerica.com for admission and scheduling information.
