

A $4IR^2 > 4C$ Concept = Progress depends on **People** > Collaborating in "Context-in-Concert" > Civilly

Everything starts with People. What/Who are **People**?

We Humans (People) are classified by Science as an Order = Primates > Genus = Homo > Class = Mammalia > Species > Sapien Sapien > in Extant (still in existence). Modern Human Beings are Homo Sapiens Sapiens in Extant (for last 60,000 years).

For reproductive and survival purposes, Homo Sapiens Sapiens are divided into Child-Bearers/Retainers and Protectors/Providers to accommodate the longest dependency period (birth to independent adult) among all Mammals.

The 21st Century Problem = Community Living with no unclaimed territory available for Ys-chromosome-based DNA unsubscribers like America's Westward Movement (e.g., Lewis and Clark, and Apple). Western Movement was available to those with grit/Brawn/OJT and had a wide base (40% of the population). Westward Movement is now based on grit/Functional Intelligence/OJT, which has a small base (12% of population). In October 2018, Apple, Google, IBM, and their friends dropped college degrees as a requirement for BioSciTech Top Tier employment. College graduates are now expendable in the BioSciTech World.

Building permanent communities began with the advent of farming (domestication of plants and animals; 10,000 years ago). Our inherent Gender roles have been under constant cultural realignment to accommodate the ensuing non-migratory lifestyle. However, our chromosome-based DNA-assigned Physiques, Physiology, Intellects have remained the same.

To preserve Our Species and facilitate "Survival of the Fittest" > Human Beings have been specifically designed to-collaborate (collaborate – not comply – not cooperate – not compete > collaborate). Only Collaboration based on the Principles of What is! and 4A (Anticipate > Accept > Adjust > Adopt) can

save America's Promise during $4IR^2$ > The Age of Automation (2012–2072).

At the moment, Americans failure to collaborate – anywhere – at much of anything – has America sucking hind-tit in the Global Economy. America has lost 32% of its Global GDP market share since 2000. As the accelerating U.S. National Debt (almost doubled since 2016) > the U.S. escalating Trade Deficit (\$60 Billion+ / month) > U.S. Citizens growing dependence on Government subsidies — so testify.

There are two primary, separate, distinct and unique Types of People living in America (aka: modern human beings).

- 1) X-Chromosome-based DNA built Physiques > Physiologies > Intellects and their Inherent Perspectives (to Process – aka: Gatherers).
- 2) Y-Chromosome-based DNA built Physiques > Physiologies > Intellects and their Inherent Perspectives (to Anticipate – aka: Hunters).

These two primary types have fallen into Gender hostility, parsed communities with declining standards of living and rising violence (crime rates).

NOW — we offer a light at the end of the Tunnel of Disruption > the recognition of "Functional Intelligence" and validating "Degrees of Competence" that recognize and accept that Science is based on Principles not Data/Dogma or Subordinating Perspectives.

YsUpAmerica.com offers the necessary Curriculum to DIY > Prep for the Top Tiers of Top Tier Employment during the "Age of Automation".
