Combine the above into a coherent statement of 60 words or less. (It's the least you need to know.)

The U.S. Constitution is a Contract between Americans and their government that organizes American society by providing a political/legal structure of the people, managed by the people, operated for the people, that optimizes the options and opportunities of all citizens while protecting the Rights of Minorities based on the "Rule of Law" = NO Law may violate the U.S. Constitution.

A Postulate is a method for "Prioritizing" options and opportunities in — Life > Employment > Relationships — by formalizing the least you need to know to make a productive decision or launch a successful course of action. A Postulate answers 5 questions in a single statement of 60 words or less: 1) What is it? 2) What does it do? 3) How does it do it? 4) Why should I care? 5) What can I do to accommodate, adapt? (Reconnaissance Tools) Question 4 is the most important. You should not waste your time considering another person's interests/issues that do not complement/affect your own.

A Visceptual is a graphic presentation of a "Concept in Context" for Ys-Persons with the Right Stuff — who *assimilate* more efficiently than they *memorize*.
